

## Questions private- public option for Jockey's Ridge Park

To the editor:

This letter is in reference to the pedestrian light/crossing signal at Kitty Hawk Kites and Jockey's Ridge. I would like to know how the town justifies this crossing? Not only does this cause traffic problems in the peak season, but it also averts tourists from using the designated park service entrances, which our taxes pay for. This also, no doubt, adds to the profits of this business. How can one business operate and profit through the use of a national park? If someone opened a hot dog stand on the ridge, would this be allowed? I think not. It seems that certain businesses are privileged on the Outer Banks. Politics as usual. Thank you for publishing and responding.
